

Our standard industrial staircases offer affordable solutions but with a more aesthetically pleasing handrailing design.

- Fully welded box section handrailing arrangement with chequerplate treads.
- Available in a range of colours to suit your requirements.
- Fast site installation.

Should you require something a little more, we can offer a wide range of alternatives featuring various staircase and handrailing designs to suit the customers requirements and budget.

The staircase below has a stainless steel handrailing and timber overlays to the treads and finished off with a nosing tread.

Depending on the requirements and usage, staircases can be designed to either part K or part M, our standard box section handrailing is compliant with both parts K and M, allowing us to offer part M staircases at affordable costs.

Chequerplate nosings can be painted any contrasting colour to suit the customers taste.
